

Data Sheet

Seed Mix Type E

Seed for extensive and simple intensive green roofs with herb-grass vegetation

Technical details and properties:

Material: **Variant E-Herbs** approx. 30 herb types
 Variant E-Grasses approx. 9 grass types

Specific properties:

- Seed quality as per FLL quality requirements for the composition of wild plant seeds from reproduction stock
- Minimum seed purity greater than 75%
- Minimum germination capacity greater than 70%
- Carrier fabric for even distribution of seeds

Delivery form:

In breathable cloth bags for either 200 or 500 m²
 Herb and grass seeds may be packaged separately

Quantity per delivery unit:

For 200 m ² :	232 g herb seeds plus 66 g grass seeds on request
For 500 m ² :	580 g herb seeds plus 166 g grass seeds on request

Area of use:

For nature roof system build-up (including pitched roofs)
 Can be used as a supplement to sedum shoots (which are then 50 g/m²)

Installation

Pre-mix the seeds, spread evenly over the leveled vegetation layer and rake into the surface. Thoroughly water the surface area. Maintain regular irrigation until the seeds germinate and are sufficiently rooted.

(See also Optigreen instructions for completion care)

Storage:

Dry and protected from frost
