

OPTIGRÜN WRB 95

Water Retention Box

Water Retention Box made of recycled PP material. With high temporary and possibly permanent retention volume in combination with a Flow Control System for specific regulation of water discharge and/or water storage.

Material	Recycled PP
Nominal thickness	approx. 95 mm
Grammage	approx. 8.0 kg/m ²
Colour	black
Compressive strength (DIN ISO 25619-2)	approx. 800 kN/m ² with 10 % compression
Cavity volume	approx. 95 Vol. %
Retention volume	approx. 90 l/m ²
Quantity/delivery unit	Individual elements Measurements: 1.19 x 0.59 m approx. 0.702 m ² /individual element
Delivery form	Disposable pallet with 42 individual elements approx. 29.484 m ² /pallet
Pack size	LxWxH 1.2 x 1.2 x 2.2 m
Delivery weight	approx. 260 kg/disposable pallet

Area of use

- For the construction of retention roofs on roof areas with 0° roof pitch
- Suitable for use under intensive greening and traffic areas with particularly high loads on the insulation level

Specific properties

- Base plate with load-distributing structure
- For temporary and/or permanent storage of rainwater with regulated water discharge through a Flow Control System
- With Capillary Bridges to transport stored rainwater from the drainage level into the substrate layer and to increase evaporation (accessories)
- High compressive strength
- With freely flowable structure for quick distribution of rainwater within the retention room
- Suitable for inverted roofs (when used on inverted insulation, no permanent water storage is possible)

Accessories

- Capillary Bridges (Art.-No.: 31808)
- Connectors for creating a stable joint between the Water Retention Boxes (Art.-No.: 31807)
- Flow Control System for regulated water discharge and/or water storage.
