....m<sup>2</sup> Optigreen protection and storage fleece Type RMS 500 as protective layer over the root-resistant roof membrane or Optigreen Root Barrier Membrane

....units of Optigreen Solar Module Support “Sun Root”, and as required, module fixing profiles

As required: For irregular roof pitch (2 - 5 %) usage of the “Roof Flex” retrofit kit to adjust height and angle of the modules

....units of photovoltaic modules

....m<sup>2</sup> Optigreen Suction and Capillary Fleece 600 K over the “Sun Root” solar module support and underneath the substrate, where it conducts water beneath the modules

As required: For photovoltaic modules of 1,200 mm Optigreen drainage board Type FKD 25 between the solar “Sun Root” supports

....units of Optigreen Combination Control Shaft fitted over the roof drainage outlets

....m<sup>2</sup> Optigreen Extensive Single Layer Substrate Type M with 60 litres/m<sup>2</sup> applied to the suction and capillary fleece 600 K or the “Sun Root” and, as required, to the drainage board FKD 25

....m<sup>2</sup> 50 g/m<sup>2</sup> sedum shoots

As required: Pre-cultivated vegetation mats Type SM/G in windy areas

....m<sup>2</sup> maintenance care
